

Bloodborne Pathogens Exposure

As required by law, an exposure control plan shall be developed and adopted for use in the district. The plan shall be designed to reduce an employee's exposure to bloodborne pathogens in the workplace.

It is the district's full intention that, if necessary, the physical facility, work practices, and other areas will be modified to attain the plan's goal. In addition, employees will be informed and trained so that they, too, can contribute to the reduction and elimination of exposure.

To ensure that the exposure control plan is kept up to date, it will be reviewed and amended annually, and whenever tasks are implemented which may affect occupational exposure.
