

Evaluation and Supervision of Professional Staff

The purpose of supervision and evaluation is to improve the instructional program and the effectiveness of the staff. Much of the supervision will center around the use of new aids and techniques, innovations, methods, resources, and materials which assist the teacher in carrying out an effective learning activity:

1. To provide a sound basis for teacher improvement; and
2. To provide an objective measure of teacher effectiveness.

Building principals shall have the primary responsibility for observing and evaluating professional staff performance.
